Chlorinators
Since 1992**

MODEL	Chlorine Output	65% Gran. Equiv.	Chlorine Prod. in 8 hours	Liq. Equiv. Prod. in 8 hours
EC2000 RP2000	20g/hr	30g/hr	160g	1.33 litres
EC3000 RP3000	30g/hr	46g/hr	240g	2.00 litres
EC4000 RP4000	40g/hr	61g/hr	320g	2.66 litres

EC is a standard manual cleaning model
RP is a self cleaning model

SIZING CHART

To calculate the chlorine output required:

1. Determine your pool size (litres).
2. Move along the horizontal line until you reach your climate zone.
3. Go down to determine the amount of chlorine you require (g/hr).
4. Always allow an extra 10-20% - if your budget allows for it.
5. In commercial installations allow at least 100% extra.
