

Semi-Commercial Units

SC80 – SC400

Available with non-reversing or reversing cells, producing from 100 to 400 grams per hour

Advanced microprocessor control unit with easy to use LCD interface

Efficient Switch Mode Power Supplies

Liquid cooled power supplies using heat exchanger technology

High-Quality lubrication free 2-way valves with the option for full automation

Power supplies using PWM control for accurate and efficient chlorine production

Proven cell configuration incorporating the very best available DS-MMO electrode material which is manufactured in the USA

Ideally suited for applications that do not require the outlay of a full commercial installation

Salinity Range 3,000 - 36,000 mg/L

Valves with the option
for full automation

Utilising our proven cell
and electrode design with
improved commercial
grade components

Unit 4 Laguna Seca
Ballito
